EMPRESS MINES CO. LTD., WORKING STEADILY

Station Expected To Be Cut At 450-foot Level—Start To Drift On Ledge

The Empress Mining Company, Ltd., mine of Newtown is down about 300 feet and plans are to sink to the 450 level where a station will be cut. They will then start drifting on the ledge.

A number of new buildings have been erected and the new gallows frame looms up above everything else.

At present the company is erecting a mill.

Several men are working on the pipe line that supplies the mine with water.

Ore values are increasing as they sink, and they feel very much encouraged.

There are 420 acres in the property, situated four miles west of Nevada City.

In 1920 an inclined shaft was started and was finally sunk 200 feet on the vein and about 300 feet of drifting was done.

The vein is reported to be two to three feet wide and carried bunches of sulphides of good grade in places.

Lack of finances and inefficient milling methods were blamed for the closing of the property in 1923.

Mr. Ed Jacobs is superintendent at the mine. He has 25 men employed at present.

The future of Newtown looks very promising.

MINE TO REOPEN ON HORSE CREEK

What is believed to be the source of a large gold supply in the creeks and the ravines from near the famous old Offield Mine, three miles west of Horse Creek, Siskiyou county has been reported this week by Mr. Lewis, who only recently opened up his old mine, where he found in wash gold from 20 cents to $1.00 per pan, and discovered near the top of the mountain above the mine a very rich ledge, that apparently for years has been supplying the creeks and ravines near by. The Offield Mine has been worked since the early sixties by Indians and white men, at different times, and a lot of money has been taken out at that one location. The country is heavily grown with brush and possibly accounts for the reason that the discovery was not made before.

SIERRA MINING SYND. READY TO HYDRAULIC

The Sierra Mining Syndicate, who are operating the Fenton Mine, beyond Quaker Hill, are still making preparations for the spring rains. New ditches are being dug to carry water for hydraulic operations. The company has built several new buildings. A beautiful, modernly equipped residence has been built for Superintendent Hays.

Before he took sick Wm. Fenton superintended the construction of a pipe line with valves in the pipe.

About 15 men are employed at the property steadily, which are all that are required for the present amount of work. No applications for work are being received at this time.

UNEMPLOYMENT SOLVED BY GOLDEN TASK

Robert Smith and Bill Addington believe they have settled this unemployment problem for themselves. After sulicing four days in the Red Channel gold diggings 25 miles north of Bakersfield, near Woody, the two found their placer operations had netted them $70.

BIG ROAD CONTRACT CLOSE TO TWO CITIES

A call for bids has been issued from the State Department of Public Works at Sacramento, for the grading of 11½ miles of highway between Gold Run and Airport in Placer County. This is about 15 miles from Grass Valley as the airplane flies. Engineering estimates place the cost of work at $825,000.

The grading will require the moving of 803,000 cubic yards of earth and rock. The time limit for completing the project is 300 working days and it is expected that the successful bidder will employ at least six power shovels during construction. The work is expected to start in the vicinity of Gold Run during the present winter and to be in full operation throughout the project this coming spring and summer.

The new section of highway will have a roadbed 28 feet in width with curves of a minimum radius of 500 feet. There will be few curves, in comparison with the existing highway. The distance between Gold Run and Auburn will be shortened by nearly two miles and the travel time beteween the two points will be cut about in half.

CITIZENS COUNCIL TO MEET IN WOODLAND

At a special meeting of the Executive Committee of the Sacramento Region Citizens Council held at the Hotel Senator, Sacramento, the time and place for the next regular monthly meeting of the Council was fixed for Saturday, December 12th, at the Hotel Woodland, in Woodland Yolo County.

Plans will be laid at the Woodland meeting for feature publicity during the year 1932 to get the full value of the diversion of travel into the region from the large number of tourists who will come to California for the Olympic games, which are to be held during the summer of 1932.

A study of committee functions will be made and a new program of activities to correlate the twenty one counties in the region into a strong unit for exploiting the resources of the region has been arranged for the Woodland session.

The Council will undertake a campaign during 1932 to place the Sacramento Region and its attractions and resources before the readers of all forms of informative publications throughout the eastern portion of the United States, and will further plan to reach the railroad and steamship selling agencies sending travelers into California, to tell these travelers of the diverse resources of the twenty one counties represented by th Council.

BIGELOW SUBMITS FIRE REPORT OF TAHOE FOREST

Forest Supervisor R. L. P. Bigelow of the Tahoe National Forest with offices in Nevada City has submitted a report of the fire situation in the national forest during the past season.

Despite the fact that the season was a long dry one, preceded by a rainfall much below normal, there were only 145 fires in the forest area during the fire season just closed.

The fires by counties follow: Placer County, 43; Nevada County 35; Sierra County, 31; Yuba County 25; Washoe County, Nevada, 7; Douglass County, Nevada, 4; and Ormsby County, Nevada, 1.

There were seven fires that burned over an area of more than 100 acres, the two largest being one at Hobart, burning over 1,833 acres, and another at Forest Hill, 2,950 acres. This was a fire which escaped from a state fire outside the forest and for a time menaced the little town of Forest Hill.

Mr. Bigelow states that of the 145 fires 104 were "man caused" and preventable, forty-six were due to carelessness of smokers and twelve to campers. There were twenty-two incendiary fires.

The total area burned over was 3,067 acres within the national forest and 3,129 outside the forest from which the fires escaped and threatened forest lands.

Total damage caused by these fires

Congressman Englebright Opposed To Restricted Mining Rights

Another Attempt Is Made To Pass Legislation To Mining Claims Within Forest Reserve

FOR more than 20 years repeated efforts have been made by the Forest Department of the United States to stop the location of mining claims within the Forest Reserve. While their efforts are not aimed so much at the legitimate miner as to the hot dog stands, etc., set up on land, which was supposed to be located for mining purposes only, this would incur a great injury and hardship to those who wished to locate legally for the purpose of mining and would practically put a stop to locating of new claims, because the most valued areas of the United States lie in the National Forests

This is very true of California; where an examination of the Forest Reserve map will show that they cover a large portion of the Mother Lode Counties. To stop the locating of mining claims within the Forest Reserve would practically put a stop to the future development of mines.

Having met with defeat year after year, on proposed legislation in Congress, the Department has tried various angles. The latest angle being to get the co-operation of the State Chamber of Commerce. The regrettable part of the affair is that many men, who, in their position of being most interested in mining, have, through various ways, either coersion or persuasion, come to the front favoring legislation restricting mining within the National Forests.

One of the most recent to appear is Dean F. H. Probert of the College of Mines, University of California, chairman of the mineral committee of the statewide Chamber of Commerce, who says:

"During recent years it has been a too common practice in California to file on mining claims in national forests for purposes other than mineral development. Investigations have revealed that many of these claims are being used for commercial and recreational purposes, such as hot dog stands, gasoline filling stations, resorts, etc. These practices are not in accordance with the intent of the law as originally proposed.

"It is the general feeling of conservation and mineral interests that a continuation of these practices will result in discouraging legitimate prospecting and mineral development in National Forests."

An article appeared in the August issue of the California Highways and Public Works magazine, issued by the Department of Public Works in which the proposed legislation was outlined. A copy was sent to Congressman Englebright with the suggestion that he introduce it into the next session of Congress. This he refused to do and stated further that he would fight any such legislation attempted in Congress.

Congressman Englebright feels that while there is no doubt that many fraudulent mining claims are located, it is not the right of Department of Agriculture, under which head the Forest Reserve functions, to say whether this location is for legal mining purpose or not; That the mining laws of this country have brought about the greatest mineral development within the United States of any country on earth, due to the existing liberal mineral laws. He was strongly opposed to any change whatsoever of the present laws, and was prepared to fight to a finish any such proposed legislation. He is in Congress to do all in his power to promote mining within his State and particularly in this district, which covers practically all of the mining sections of California.

Congressman Englebright regrets very much that a number of the mining fraternity have been willing to

(Continued on Page Six)

Sports At Ski Course

There was a well attended meeting of the Nevada City-Grass Valley Ski Club last evening at the Chamber of Commerce headquarters in this city. Secretary Eben K. Smart and several members were up from Grass Valley and Vernon Stoll was on hand with newly prepared articles of incorporation for the club, which were adopted after a short discussion.

When the new improvements decided on last night by the members are installed it will no longer be necessary to wander around with a grouch watching others getting all the enjoyment out of life, for even the elderly boys and girls are going to enjoy the toboggan slide.

Yes, that's what they are going to have, and the grown ups and kiddies too will be able to scoot down the long, protected runway among the pines in perfect safety. And, best of all, there will be no tough drag up the hill, because all you'll have to do is to sit on your toboggan, hook it on to the endless steel cable and ride back to the top again.

Arrangements have already been made by Sheriff George Carter to procure a gas engine and cable for an endless rope system such as is used at Truckee and other places for this most popular sport.

It has been the endeavor of President Charles Leiter and other members of the club for some time to get the toboggan installation because they realize that many people who come here from the lower altitudes are naturally without any equipment to get any enjoyment from their visit

A small fee will be charged for the rides and they are bound to be very popular because the Central House course is as fine as any in the state and it is certainly the most convenient.

The ice skating pond has been completed at the south end of the tract and only a couple of hundred feet from the highway. It is 55 by 150 feet and as soon as Jack Frost gets settled down to business, water will be brought to the pond and those who seek this most graceful and exhiliarating sport will be able to enjoy themselves.

Through the courtesy of the Symons Co., Ltd., who are contracting a section of the Tahoe Ukiah highway above the Central House, the Ski Club will have the use this winter of a 3000 watt electric lighting plant. President Leiter says that this plant will be in service a week from next Sunday, if everything goes right. So, if the snows come on schedule, it is planned to have the course brilliantly lighted, so that it

(Continued on Page Two)

RICH VEIN OPENED IN OLD VIRGINIA MINE

As a number of families of Nevada City and Grass Valley lived in Virginia City at one time or another the following article on mines there will be of interest to them.

The discovery of a rich vein on the 200-foot workings of the famous old Consolidated Virginia Mine has been confirmed by Charles G. Egan, manager of the Consolidated Virginia-Andes Mining Company. The ore body is about four feet wide, was opened in a stope north of the main level, and shows twelve inches of high-grade and three feet of shipping ore.

The high-grade shoot includes a six-inch streak of blue quartz splashed with free gold and a six-inch streak of black, soft material carrying considerable gold. Arrangements are being made to open the ore body on the 300 level and extract the ore at that point. The strike was made in a virgin section of the old producer and is considered highly important.

SISKIYOU COUNTY MINING NOTES

Ore from the Marigold Mine, at Garden Valley, is being put through the mill of the Frog Pond mine, which adjoins the Marigold. S. W. Collins and Frank Brown are working the Marigold.

The Louis Hoskins mine, near Greenwood, has been taken over by Peck and Son, of Los Angeles. A half mile road has been built and grading is now under way for a mill-site.

The Alpine mine, near Georgetown has been taken under bond and lease by William R. Maloney and the shaft is being opened.

V. Miner, of Santa Barbara, has a bond and lease on the old Welch mine, near Greenwood. Tests on the dump indicate this property will be a worthy development and a mill is contemplated.

The Gilt Edge mine has A. B. Winn at its head and Winn is making a test at the French mine, near Greenwood.

C. R. Stewart has purchased the Gaydon claim from Clifford Cheek and will work it this winter with Frank Wilkinson and Elmer Kunezy, of Georgetown.

Seven or eight men are reprted to have begun work Monday at the old Gold Channel mine.

An unconfirmed report tells of a recent rich pocket taken out in the Smith Flat district. Rumor says the pocket yielded twenty ounces, which was a pretty find.

The Sunny Hill Mining Company has brought a quiet title suit against Frank Lowden Jr., W. R. S. Brewster, Leonard G. Taylor and others. The title clearing affects these mining claims: Grey Eagle, Lucky Luck, Summit, Bald Eagle, and Jack Rabbit, all in the Sunny Hill district. W D. Tillotson is attorney for the company.

MINING PERSONALS

Mr. and Mrs. F. W. Parsons of Wenatchee, Wash. who are interested in the Sunrise Mining and Development Company, near Grass Valley were callers at The Nugget office Wednesday. They returned to Wenatchee Thursday after spending a few days at the mine.

Wm. Fenton, who was recently operated on, is making a quick recovery and expects to soon be in his usual good health. He has a life time experience in mining, spending seven years in Alaska in one of the richest mines in that territory.

Mr. and Mrs. Charles DeWhite of Seattle, Wash., visited The Nugget office Wednesday. They are spending a few weeks at the Sunrise Mining Mining and Development Co., property near Grass Valley of which he is president.

MANY MINES TO WORK DURING THE WINTER

Mining Properties of Sierra and Nevada Counties Employ Many Men

INDIAN HILL MINE

The Indian Hill mine, near Camptonville has a crew of 12 men employed repairing ditches and flumes. There are several inches of snow at the property which will be added to by the present storm. As soon as there is sufficient water, work of sulicing will start.

KIRKPATRIC MINE

The Kirkpatric Mine near Goodyears Bar, has a crew of several men working sluicing gravel. Mr. George Nightengale is superintendent.

COMET MINE

The Comet Mine near Downieville has a crew of men working underground. Mr. Fred Richardson is superintendent at the property.

STANDARD MINE

A crew of four or five men are engaged in repairing bunk houses and buildings at this property preparatory to reopening the mine. This property is located near Downieville. Mr. Hartford Frye is in charge of operations.

RUBY MINE

The Ruby Mine near Downieville has a crew of men working. A trac-

(Continued on Page Six)

MOORE BUYS UP 7 OLD HOUSES

Joseph B. Moore has just completed purchasing seven houses in the old mining camp of Knob. He has bought every domicile that was for sale. Some of the houses are really good dwellings.

John Kutz owns seven houses he has acquired in the years he has lived there since the Midas Mine passed into the discard.

Moore purchased the Midas and adjoining mines last year at the knockdown price of $1000 set by the state in a sale for taxes. He was for years foreman of the Midas when it was a great ore producer. Moore plans to erect a flotation plant and may work the mine again.

Thirteen families are living in Knob at present, which is near Redding. House rent is cheap, water is free and wood can be had by going into the nearby hills and cutting it.

Mr. and Mrs. J. B. Moore have made their home there for several months.

THE OLD EUREKA MINE PREPARES TO HYDRAULIC

The Eureka Mine of Relief Hill is getting ready for hydraulic perations. A ditch 11 miles long is being repaired. An old tunnel is being cleaned out which will also assist in carrying the water.

The company is starting to build a retaining dam in the river to hold the debris from the hydraulic operations.

Mr. Hamilton is superintendent in charge of operations at the Eureka Mine.

A crew of between 25 and 30 men are employed getting the property in shape for spring time, when there will be an abundance of water.

LUTHER MARSH BUYS PROSPECT HILL HOME

Mr. and Mrs. Luther Marsh have bought the Eddy home from the Schroeder Estate. It is situated on Prospect Hill on Prospect Street. A beautiful view of the town may be had from this residence.

Mr. and Mrs. Marsh moved from Boulder Street to their new home early in the week.

He is manager of the Marsh Lumber Company of Nevada City.

CAMPTONVILLE NEWS NOTES

Camptonville, Dec. 4—State Ranger W. E. Sharp of Nevada City, with three Forest Service trucks, a group of Boy Scouts, in company with Forest Ranger F. W. Meggers of this place, spent Wednesday in the forests near here obtaining Christmas trees. They obtained a large tree each for the community tree for Grass Valley and Nevada City, and a number of smalle trees.

The grammar and high schools of Camptonville have closed for the fall term. The closing date is a little advanced as compared to last year, but the cold severe weather made it difficult for the smaller children and for transportation of the out of town pupils. The closing day was observed by a program at the school house.

Hawley Chatfield motored to Nevada City Mnday for a load of material for the Altaview mine.

Chas. J. Scanlan, Jr., and party returned to their property at Indian Hill Monday.

Officers and members of Gravel Range Lodge, No. 59 F. & A. M. of this place journeyed to Nevada City Saturday evening as the guests of Nevada Lodge No. 13, F. & A. M. at which place the Third Degree of Masonry was conferred on a candidate of Gravel Range Lodge. A banquet followed the meeting and a very enjoyable evening was spent. The following local Masons were in the party going from here: Fred J. Jubert, Wm. O. Grant, J. E. Pauly, A. M. Cleveland, G. C. Tabler, E. Pauly, and D. Lewis. A number of Masons from Grass Valley were also present.

NEW SPORTS AT THE SKI COURSE

(Continued From Page One)

may be used at night as well as by day.

Caretaker George Flambigl is right on the job and has had an order in for this snow we are getting for several days. While George's official duties are primarily to see that the snow falls in the right places, he has made himself a comfortable bachelor's nest at the club house and has found time to make a great many little improvements around the place as well. Particularly noticeable is the elimination of the muddy crossing just south of the entrance to the club house.

He will have hot coffee and lots of good things to eat as well as a nice warm fire next Sunday for those who get chilled.

There are now over three hundred local members of the club but there should be many more. Things are going along nicely and it is everyone's duty to join and help boost the club, because when the new installations are made it is bound to bring a large number of outsiders to this vicinity, and this will be good advertising for all of us.

AVOID RICH MIXTURE IN MOTOR

The carburetor mixture should not be enriched unless it is absolutely necesary, even if the engine is hard to start in the morning, according to the Free Emergency Road Service of the California State Antomobile Association. While a rich mixture makes starting easier, both fuel and power are wasted after the motor is warmed up.

BIGLOW SUBMITS HIS FIRE REPORT OF TAHOE FOREST

(Continued From Page One)

was $21,746.42 which includes loss of buildings and other improvements

The fire fighting cost was $17,898 or approximately $2.88 per acre. The cost per fire was $123.

The average cost per fire during the past five-year period was $308 or $4.25 per acre.

Bigelow attributes the reduction in cost per fire to better equipment, intensive organization and holding to the standard of bringing every fire under control within twenty-four hours of its starting.

It is the policy of the forest service to build roads and motor ways through the forest to bring inaccessible areas into closer communication with headquarters and making it possible to get firefighters on to a fire within at least an hour of its being reported.

A four day field meeting was held by Supervisor R. L. P. Bigelow and all rangers after the fire season was over. All fires of any size were taken up and criticised individually. They analyzed the way the fire was handled, the mistakes if any, and suggest more efficient ways of handling them in the future. This is done to perfect the firefighting system of the Forest Service, and has added greatly to the efficiency of their system.

These field meetings are held each year as soon as the fire season is over.

Mr. Bigelow is not only a very efficient head of the Tahoe Forset Service but is also a valuable citizen to our community as he is always willing to give a helping hand to miners, farmers, stockraisers and in fact people in all walks of life. In local affairs he is always among the leaders in giving assistance. He is also one of the most active members of of the Boy Scout movement.

All employees under Mr. Bigelow work with such harmony that he has a forest service organization that is considered the best in the West.

Mr. Bigelow is no stranger here as he has been with the Forest Service for 23 years.

Millions to spend

for others' happiness

IT'S GREAT to have extra money for Christmas—cash to purchase gifts for loved ones, and to share with those less fortunate.

More than 78,000 Californians know this joyous feeling. This week they are receiving a total of over $5,000,000 from their Bank of America Christmas Club accounts.

This great prosperity fund is distributed throughout the state. Small amounts, saved week by week and scarcely missed, have grown with interest into this impressive total.

In returning these Christmas Club savings to depositors, we are grateful for this opportunity to help stimulate business and employment—here and everywhere in California.

JOIN NOW FOR NEXT YEAR

1932 Christmas Club starts Dec. 7th . . . Initial deposits will be accepted up to Jan. 31, 1932.

GOLD LEDGE DRIFT ENTERS PAY ORE

Thi[illegible] Level of

winze below
Gold Ledge Mi[illegible]
Feliciana mine, Mariposa [illegible]nty, is entering the downward extension of the payshoot, according to reports from Superintendent L. A. Rihn to the San Francisco headquarters of the company.

Rihn reported that the drift had penetrated the oreshoot for a distance of more than eight, with the quartz showing free gold and panning very heavy. The vein shows 15 inches of highgrade and 18 inches of lowgrade ore, with one assay of the rich material running $160 to the ton.

A. D. Frumento, mining engineer from the British Columbia who made a through examination of the property recently, traced a newly discovervein located about 200 feet from the Feliciana ledge on the surface. Indications are that both will join at a depth of about 700 feet, judging from the dip of each ledge.

Gold Ledge, Ltd., which is a mine holding company, has repaired the shaft collor and retimbered the shaft of the Duncon gold quartz mine in resuming development of this property.

SIXTH HEALTH ARTICLE WRITTEN BY CRONWELL

Article six of a series of health articles written by Dr. B. G. Cronwell, Chiropractor and food scientist.

Silent sickness is a very serious problem to-day and we are unable to meet the situation as the general public just will not lend their cooperation. By silent sickness we mean the people who go on from day to-day not knowing that some one of their vital organs is slowly day by day until out of a blue sky the person who has always been looked upon as very healthy and never sick, finds them selves flat on their back and usually live from one to twnety-four hours. The person in pain usually lives on for years. Pain is the interpretation of the body struggling at that point to restore the equilibrium.

If a person breaks a bone and does not suffer a great deal of pain for the first few days then we know that the bone is not healing very fast. There is an old saying which is a very truthful one and that is that the back bone never lies. There never was and never will be a condition of illiness that did not show up in the spinal column from one to ten years prior to their death. They just continue to go down to the table three times a day and eat more than any other person present. How wonderful it would be if we could open the body just as we do a book and give all these vital organs the once over every few days and know their true condition and do some thing while the condition is in the acute state. Malnutrition is usually the cause of the depreciation of the muscle tissue of these organs, without which they can not function normally. The pinching of a nerve at the spine will slow down the muscle actoin of any organ or group of cells and could be corrected long before it became very distressing. The Chiropractic profession has been trying for years to educate the general public to have their spine examined once if not twice a year which would obsolutely do away with the so called silent sickness. After a serious accident Sureon has dressed and set the broken bones, to neglect having a Chiropractor examine the spine and remove all the impingments which lead to the injured tissue will result in very slow healing. Some times a broken limb will heal very readily, but be so weak and develop pain after trying to use it for an hour or so. About three good spinal adjustments and they can use the limb as well as they could before the break. Children in their rough playing sometimes bring about very bad distortions of their spine which in time brings about some of the misterious illiness that so many children develop even with the most careful raising. Many a grown person has worn glasses the biggest part of their life as a result of severe fall while running at play. The wise Mother to-day is paying particular attention to the care of their childrens spines, knowing the importance of reaching their adult age with perfect spines.

Question— Should potatoes be served with a meal containing meat? Mrs. S.—

Mrs. S.—Potatoes are a substitute for meat and should be used baked or boiled with the jackets. It is better to eat the jackets and cut away some of the center if you wish to be real careful about your diet. Serve plenty of celery, lettuce and leafy cooked vegetables with meat.

Question—What is the cause of the blood turning to water and causing diabetes? Mr. L.—

Mr. L.—The blood does not turn to water. Poor circulation of the blood and the kidneys not functioning as they should. The water which carries the chemical valuation of your foods into the blood stream is not taken out by the kidneys which leaves the tissue loaded with this surplus water. Avoid the use of salt as much as you can and add more fresh fruits and vegetables to your diet.

Do You Know?

There are three thousand two hundred and eighty five licensed Chiropractors in California and they are caring for sixty five per cent of the sick and afflicted without the aid of Hospitals, School Nurses or appropriations.

If you have not experienced and learned the valuation of Chiropractic spinal adjustments for any and all ailments the human body is subject to, then that is just too bad.

Here is a chance for you, commencing next week I will give my services free of charge three afternoons from 1 P. M. to 4 P. M. on Monday, Wednesday and Friday.

If you will come in during those ours I will give you a thorough examination, including, blood pressure test, spinal analysis and one complete adjusting.

I am doing this that we might be able to say that there is not a person in Nevada City who does not know what to do at the first sign of illness

GEOGRAPHY, POWER AND MINERAL RESOURCES OF

(Continued From Page Four)

These two consolidations control most of the mines and mineral rights in the Grass Valley district proper, in or near the town of Grass Valley.

The principal operations in Nevada City district in later years were at the Champion-Providence group and owned by North Star Mines Company. Recently, the Murchie mine there has been reopened and it is hopeu that it may become an important producer. Other attempts of small or inadeuqately financed companies to open paying mines in these two districts during the past 12 years have been largely abortive.

In the Washington and Graniteville districts there have been several efforts in the past few years to rejuvenate former producing properties. At present one well financed company is carrying on prospecting and development whic may bring in a new mine near Washington.

A CHRISTMAS BARGAIN!
$2.50 for your old heater *on this new Electric Heater*

CHILLY, winter mornings are here. So have this new Wesix electric heater handy for dressing, bathing, or shaving. Our low electric rates make it economical to use.

Trade In Your Old Heater

We'll allow you $2.50 for your old wood, coal, oil, or portable electric heater, no matter how worn and battered it is. You get the $12.50 Cent-a-Watt for $10.

This heater heats the air in small rooms. It is made upon the same principle as its successful big brothers which heat entire homes, apartment houses, and schools. It is finished in aluminum, is light in weight, and plugs into any convenience outlet. Approved by the National Board of Fire Underwriters.

Let us pick up your old heater and deliver this new one. It will make a wonderful Christmas present that will radiate warmth and cheerfulness for years. The easy terms of $1 a month for ten months will not interfere with your Christmas budget.

The Cent-a-Watt electric heaters are going fast, so you should bring in or telephone your order right away. Then you will be sure of your heater immediately.

This offer is also available at your dealer's!

MRS LELAND SMITH GIVEN SURPRISE PARTY

Mrs Leland Smith was given quite a surprise on her birthday last Monday, when she called "come-in" to a gentle knock and found a group of friends standing in her doorway.

Cards were enjoyed for a few hours after which dainty refreshments were served.

Mrs. Smith received a number of nice gifts.

Those present for the happy occasion were, Mrs. Lou Elkus, Mrs. Wm. Fouyer, Mrs. Farmer, Mrs. Aubrey Wicker, Mrs. Ray Davis and Miss Alma Marsh.

LOSS FROM MOTH DAMAGE HERE SET AT $3400

Nevada City homemakers are paying tribute to the moth to the tune of $3400 a year.

This is the estimate of the Rex Research Foundation, Chicago, which calculates this as the dollars-and-cents loss from damage sustained by local families from moth-ruined upholstery, fabrics, furs and clothing every twelvemonth. The figure is based on a total national annual loss of $250,000,000 or roughly, ten dollars per family.

"A thief with a taste for treasures" is the way Foundation characterises the moth. A moth prefers to breakfast on the finest woolens, lunch on costly furs and dine on the most prized upholstery. There are four stages in the life cycle of the moth but the second stage or larvae stage, which lasts from fifteen to twenty weeks, is when the most damage is done. If every housewife were to make a regular practice of spraying for moths, many of the heartaches that now follow the loss of treasured household articles would be eliminated, the Foundation believes.

For complete protection against moths The Foundation recommends three steps:

All clothing, furs and fabrics to be stored should be well shaken out and thoroughly brushed. Special care should be taken to brush beneath the coat lapels and in the pockets, folds and creases. As moths seem to prefer soiled garments and fabrics, washing or dry cleaning helps to discourage infestation. The next step is to air these articles in the sunchine for a day. Strong light destroys all forms of moth life. Finally, to make moth annihilation complete, the garments as well as the walls, cracks and shelves of closets and interior of trunks, drawers and other containers are sprayed with an effective moth spray. A good spray not only kills any moths which have been left after cleaning, shaking, brushing and airing, but keeps away or kills any new moths that venture near. Spraying thoroughly into closets and containers every two weeks gives complete and continued protection.

ENGLEBRIGHT OPPOSED TO RESTRICTED MINING RIGH

(Continued From Page One)

compromise with the Forest Reserve in regard to this matter, as he feels these will be used againt him in his fight, that they will be quoted as saying that the mining fraternity of California was in favor of the proposed legislation.

This matter will be brought up at the next general meeting of the Mining Association of California to be held within the next few weeks and resolutions will go to the Congressmen and Senators of this State.

In the meantime it would be well for our readers to assist Congressman Englebright by writing him of their opposition to the law.

The newspapers of the mountain counties should oppose this legislation editorially and otherwise. The fight will be a bitter one and should not be left to Congressman Englebright to fight single handed.

Senator Shortridge has pledged that he will oppose such legislation as per a letter recently received by the editor and published in The Nugget last week.

ELECTRICAL WIRING

L. B. Gregory will do all kinds of electrical wiring and all kinds of ignition work. He is well known here for his high class work.

Anyone wishing his services may call the Miners Foundry, Phone 10.

MANY MINES OPERATING DURING WINTER MONTHS

(Continued From Page One)

tor and men from Camptonville took a load of machinery to the property in the last few days. They encountered several inches of snow on the way in to the property.

SLUICING IN RIVER

Seven or eight men above Edwards Bridge, near Blue Tent are sluicing gravel in the bed of the South Yuba River. One of the men who was in Nevada City recently stated that thew were making from $1.50 to $2.50 a day. The water is a little high for operating the sulice boxes, but he remarked they were making a living. Just below Edwards Bridge there are a number of men working in the river also.

CENT A MILE FARES FOR CHRISTMAS AN NEW YEAR

Authorized for both the Christmas and New Year periods, cent-a-mile offerings of transportation will be made by the Southern Pacific Company for the benefit of holiday travelers, it was announced today by E. W. Clapp, general passenger traffic manager for the railroad.

At the same time, Clapp revealed, the company has completed arrangements whereby the special low-fare excursion tickets may be given this year as a new kind of Christmas present.

Prepaid tickets, purchased under the plan, will be delivered to persons at all places on the railroad's Pacific lines, extending from San Francisco to Ogden and Salt Lake City, and from Portland to El Paso, according to the anouncement.

The first series of excursions will be conducted December 22, 23, 24 and 25, to be followed by another on December 30, 31 and January 1 Clapp stated. The final return limit for both will be January 5, he said.
